2016 JMM original concept

- At the 2016 JMM in Denver I ended my talk on connecting WeBWorK and Moodle with an example of embedding WW problems independently in an html page.

- My plan was to present this stand alone page to my second semester calculus class as an overview/sample of what they were in for.

- https://demo.webwork.rochester.edu/public/features/05embedded_questions/

- local 2016_01_JMM_Seattle_mth162_overview copy.md file also available

Iframe for first problem

```
<iframe  width="800" height="600"
src="https://demo.webwork.rochester.edu/webwork2/html2xml?
    &answersSubmitted=0&
    &sourceFilePath=Library/FortLewis/Calc1/06-01-
Antiderivatives-graphically/AF1/AF1.pg&
    &problemSeed=123567&
    &courseID=daemon_course&
    &userID=daemon&
    &course_password=daemon&
    &showSummary=1&
    &displayMode=MathJax&
    &problemIdentifierPrefix=102&
    &language=en&
    &outputformat=sticky">
</iframe>
